

DSG GREEN

ECO SQUAD

“We pledge to make sustainable choices in our present and create a greener future for ourselves and generations to come because we understand that “Sustainability is here to stay we may or may not be”

- Human Activities are continuously overloading our atmosphere .
- The results are evident in form of frequent storms, forest fires, viral diseases and climate change
- A significant part of these emissions comes from fossil based energy sources
- Pakistan is standing at the verge of being energy deficit and it's sad to know that many people are still devoid of basic necessity of life.

“

*In order to achieve this goal we need everyone to understand the dire need of energy revolution and join us in our campaign of becoming a “**Green Eco Squad**” to make a sustainable green and clean future for our generations to come*

How we will play our role?

- Climate Change Awareness Drives
- Say NO to Plastics
- Promote Renewables
- Plantation Drives

Plantation Drive at DSG Head Office

Because Change
Begins at Home
